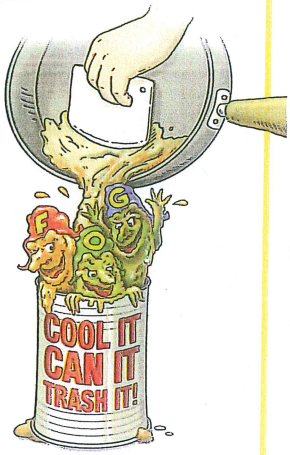
City of Webster's wastewater utility crews are in your neighborhood working hard to keep sewage flowing away from your home. Follow the steps below to help us fight future sewer backups in your neighborhood.

By following a few simple steps, you can help prevent sewer backups and spills:

1. Always pour or scrape cooled fats, oils and grease into a covered, disposable container and throw it into your garbage. Never pour fats, oils or grease down sink drains or toilets.



2. Soak up remaining oils and grease with an absorbent material, such as paper towels, and throw into your garbage or yard/food waste bin.

3. Before you wash dishes, scrape food scraps, fats, oils and grease into your garbage or compost.

4. Use sink strainers to catch any remaining food waste while washing dishes.

For information about how to prevent water pollution or save water in your home, contact the City of Webster Public Works at 281-316-3700 or visit www.cityofwebster.com.
